REVENUE REACTIVATION SPRINT

Riley Group Electrical Friday Meeting Runbook

Sub-account prebuild plan, 30-minute decision agenda, verified-estimate pricing guide, launch controls and post-call action path.

Contact: Percy, Riley Group Electrical Limited

Meeting: Friday, October 16, 2026 at 10:00 AM ET

Current booking: 10:00–10:15 AM — Rod must confirm 30–45 minutes

Sales owner: Rod Norville **Technical owner:** Tony DeCarlo

Internal preparation document. This is an operational runbook, not the client agreement or legal advice. No contacts may be imported or messaged until Riley approves the cohort, lawful-contact basis, offer, qualification rules, fee, ceiling and customer experience in writing.

Prepared October 15, 2026 · 1APP Technologies Inc.

1. Friday's required outcome

Do not try to complete the entire technical build during the call. Finish with one explicit status:

Ready for controlled build

Agreement and attestation approved; one cohort and offer selected; economics and fee approved; client owners assigned; secure upload scheduled.

Awaiting client

Specific missing records, approvals or access assigned to Percy with an owner and due date.

Not qualified

The list, lawful-contact basis, economics, capacity or proof process cannot support a responsible Sprint.

Separate website track

The broken website is a trust/conversion issue, but it is not part of the Sprint performance fee. Diagnose and quote it separately.

2. What is already complete

- ☐ Percy's 1APP contact is enriched and assigned to Rod.
- ☐ A Qualified-stage opportunity exists.
- ☐ The Friday appointment is confirmed in 1APP.
- ☐ The discovery and launch plan is saved.
- ☐ Tony's preparation task and Rod's pre-call task are created.
- ☐ The three-message 14-day framework and verified-estimate definition are drafted.
- ☐ A $500 maximum fee and five-estimate / $2,500 pilot ceiling are prepared for owner review.
- ☐ The sub-account blueprint and import schema are prepared.

3. Sub-account prebuild decision

> **Recommendation:** prepare the full blueprint now, but do not activate billable services. Create a blank/disabled live shell only if 1APP has a spare account slot and creation triggers no SaaS billing or usage charges.

Field	Prefill	Status
Account name	Riley Group Electrical Limited — Sprint	Ready
Primary contact	Percy · +1 416-896-0669 · therileygroup4@gmail.com	Need surname, title and signing authority
Industry / template	Electrical contractor / 1APP electrical template	Ready after acceptance
Country / timezone / currency	Canada / America/Toronto / CAD	Confirm Friday
Website	Existing site is not working	Need domain/host details; separate scope
Owners	Rod — sales; Tony — technical	Ready

Safe to configure now

Pipeline map **Custom fields** **Import template** **Workflow shell** **Stop rules** **Alerts** **Reconciliation logic** **Two-contact test plan**

Do not activate before written acceptance

Dedicated number **Carrier registration** **Email/domain authentication** **AI usage** **Calendar connection** **Estimating connection** **Customer import** **Outbound messaging**

4. Information to collect from Percy

Business identity

- ☐ Exact legal and operating names
- ☐ Full address, city, province, postal code
- ☐ Percy's surname, title and authority
- ☐ Business hours and emergency instructions
- ☐ Logo, colours and sender name

Offer and qualification

- ☐ One project/service category
- ☐ Truthful reason to reconnect
- ☐ Minimum likely project value
- ☐ Service area and exclusions
- ☐ Weekly estimate capacity

List controls

- ☐ Approximate size, source and age
- ☐ Lawful-contact confirmation
- ☐ Opt-out/DND suppression file
- ☐ Active/open/recent-record exclusions
- ☐ Secure-upload owner and deadline

Systems and handoffs

- ☐ Calendar and appointment owner
- ☐ Estimator and proof source
- ☐ Existing AI phone/marketing system
- ☐ Human takeover owner/SLA
- ☐ Preferred local area code

Important: “We own the list” is not the launch decision. Riley must confirm the selected people are currently eligible for this campaign, known opt-outs are removed, Riley is identified in every message and a working opt-out is present.

5. Friday 30-minute decision agenda

Time	Decision	What to capture
0–3 min	Frame and authority	Confirm Percy can approve/sign or identify the signer. Position the Sprint as complementary to Riley's existing inbound AI.
3–8 min	Select one cohort	One project category; list size, source, age and last interaction; exclusions.
8–13 min	Contact controls	Written lawful-contact attestation, opt-outs/DND, sender identity and secure upload.
13–18 min	Qualification and capacity	Service, geography, minimum value, timing, disqualifiers, calendar, estimator and response owner.
18–23 min	Economics and fee	Category-specific collected value, margin, written-estimate count, sold-job count, fee and campaign cap.
23–27 min	Customer experience	Sender number/name, offer, Day 0/3/8 messages, AI questions, takeover, booking, stop rules.
27–30 min	Commitments and dates	Agreement, secure upload, access owners, test date, first batch date and results review.

> **Opening:** “Your current AI handles new inbound calls. This Sprint is separate: it works one approved group of past leads or customers already sitting in Riley's records. Today we need to decide whether that group, the offer and the economics support a controlled campaign.”

6. How to price a verified estimate

Price the value of a **verified estimate opportunity**, not a booking and not a guaranteed sale. Use the selected project category's real history—not Riley's highest-value job or a company-wide guess.

1. **Average collected job value:** actual revenue collected from completed jobs in the selected category.
2. **Gross margin:** collected revenue minus direct labour, material and subcontractor costs, divided by collected revenue.
3. **Estimate-to-sale close rate:** sold jobs divided by written estimates for that category and a recent comparable period.

```
Expected gross profit per estimate = average collected job value × gross margin × close rate
```

```
Raw 1APP fee = expected gross profit per estimate × 20%
```

Round the raw fee to the nearest $25, then charge the **lower** of that amount or the standard price-band ceiling.

Average collected job value	Maximum standard fee	Control
Under $1,000	$25	Owner review; low-ticket economics may not support Sprint
$1,000–$2,499	$50	Standard
$2,500–$4,999	$100	Standard
$5,000–$9,999	$200	Standard
$10,000–$24,999	$300	Standard
$25,000–$49,999	$500	Tony/Justin approval
$50,000–$99,999	$750	Tony/Justin approval
$100,000+	$1,000	Owner review and custom written terms

Riley's stated economics

```
$30,000 × 20% × 85% = $5,100 expected gross profit per estimate
```

```
$5,100 × 20% = $1,020 raw fee → $500 price-band cap
```

The arithmetic is correct, but the inputs are not yet verified. The 85% close rate must apply to the same project category and written-estimate stage used in the Sprint.

Close-rate sensitivity at $30,000 job value and 20% margin

Close rate	Expected gross profit / estimate	20% calculation	Supported fee
20%	$1,200	$240	$250
30%	$1,800	$360	$350
40%	$2,400	$480	$475
50%	$3,000	$600	$500 cap
85% stated	$5,100	$1,020	$500 cap

> **Decision rule:** at a 20% margin, Riley needs a category-specific estimate-to-sale close rate of approximately **41.7%** before the formula supports the full $500 fee. If the credible rate is 30%, quote approximately $350—not $500.

Recommended Riley pilot terms

- Up to **$500 per verified project estimate**, only if the category economics support it.
- Maximum five verified estimates; **$2,500 campaign-fee ceiling**.
- Messaging usage disclosed separately.
- Small service calls excluded or priced under a separate written band.
- Weekly reconciliation and named client-side approver.

7. Billable verified estimate

All conditions must be true: approved cohort; positive engagement within the attribution period; written qualification met; appointment kept; dated written estimate issued within the proof window; opportunity not active before launch.

Not billable: booking alone, no-show, cancellation, duplicate, active job, open estimate, complaint, emergency, excluded small service call, unqualified prospect or undocumented estimate.

> **Client explanation:** “The fee is for creating a verified estimate opportunity from a dormant contact. Riley still controls pricing, availability, sales process and closing, which is why the fee is set as a limited fraction of the expected gross profit per estimate.”

8. Customer-experience approval

- ☐ Dedicated local number and Riley sender identity approved.
- ☐ One truthful electrical offer approved; no invented discount, urgency or safety claim.
- ☐ Day 0, Day 3 and Day 8 messages approved.
- ☐ AI qualification questions approved.
- ☐ Technical, emergency, complaint and pricing escalation paths approved.
- ☐ Calendar, duration, buffers, appointment owner and confirmations approved.
- ☐ Campaign ceiling and automatic stop rules approved.

9. Fastest safe launch path

Timing	Actions
Day 0	Execute agreement and attestation; provision from electrical template; request number/registration; issue secure-upload link; request calendar and estimating access through approved access methods.
Day 1	Import to staging only; deduplicate; suppress opt-outs/DND, active/open/recent records and exclusions; configure tracking, reply logic, alerts, booking and stops; return final cohort totals for approval.
Day 2	Riley approves cohort, offer, messages, fee and ceiling; run two controlled tests; verify sender, opt-out, takeover, booking, notifications and attribution.
Day 2–3	Release 100–250 high-confidence contacts during approved business hours; review delivery, replies, opt-outs and qualification quality before another batch.

Carrier registration, missing access, unclear list eligibility or dirty data can extend the timeline.

10. Friday close checklist

- ☐ One cohort selected and exclusions written.
- ☐ One service/offer selected and truthful.
- ☐ Lawful-contact attestation assigned or signed.
- ☐ Qualification, geography, minimum value and capacity written.
- ☐ Category economics and supported fee written.
- ☐ Billable event, evidence source, proof window and reconciliation owner written.
- ☐ Campaign ceiling and stop conditions written.
- ☐ Secure-upload owner and deadline assigned.
- ☐ Calendar, number, estimator, message approver and human takeover owners assigned.
- ☐ Two-contact test and first-batch dates scheduled.
