

1APP

30-Day Client Acquisition Business Plan

A practical growth plan to acquire 10 new paying clients every 30 days through Google Ads, outbound sales, email campaigns, and local business targeting.

Prepared for Tony DeCarlo & Justin Roffey

1APP — 30-Day Client Acquisition Business Plan

Core Target

Goal: 10 new paying clients every 30 days.

Primary offer: 1APP helps small businesses get their time back by automating missed calls, follow-up, booking, reminders, client communication, lead nurture, reviews, and operational workflows.

Positioning line:

1APP gives busy small businesses one simple app to capture leads, follow up automatically, book jobs, and save hours every week.

Plain-English pitch:

Most small businesses are losing time and money because calls, follow-ups, estimates, reminders, and admin tasks are still being handled manually. 1APP fixes that by installing simple automation systems that keep the business moving even when the owner is busy.

Buyer Profile

Best-Fit Businesses

Target businesses where missed calls, slow follow-up, manual booking, or crew/admin coordination costs real money.

Priority niches:

1. Trades
 - HVAC
 - Plumbing
 - Electrical
 - Roofing
 - Landscaping
 - General contractors
 - Renovation companies
1. Home services

- Cleaning companies
- Mobile detailing
- Pest control
- Snow removal
- Lawn care
- 1. Appointment-based local services
- Clinics
- Wellness providers
- Barbers/salons
- Auto repair
- Fitness studios
- 1. Field-service teams
- Any business with crews, job sites, dispatching, time tracking, or estimates

Best Buyer

Owner-operated small business doing \$250K–\$3M/year where the owner is still involved in calls, scheduling, admin, or crew coordination.

Pain Points

They need 1APP if they say things like:

- “I’m too busy to keep up.”
- “We miss calls when we’re on jobs.”
- “I forget to follow up.”
- “Customers don’t answer unless we chase them.”
- “My guys text me their hours and it’s a mess.”
- “I need everything in one place.”
- “I’m losing leads because I’m working in the business all day.”

The Offer

Entry Offer

Free 15-Minute Time-Saving Audit

Promise:

We’ll show you 3 places your business is wasting time or losing leads — and what automation would fix first.

CTA:

Book your free 15-minute audit.

Core Packages — Draft

Starter — \$199/month

For businesses that need basic lead capture and follow-up.

Includes:

- Missed call text-back
- Booking calendar
- Automated confirmation/reminders
- Basic lead follow-up sequence
- Simple pipeline tracking

Growth — \$399/month

For businesses that want more automation and better client communication.

Includes everything in Starter, plus:

- AI/chat or voice intake support
- Estimate/invoice follow-up automations
- Review request automation
- Reactivation campaign for old leads/customers
- Monthly performance summary

Pro Ops — \$599+/month

For field-service businesses that need operations/time-saving tools.

Includes everything in Growth, plus:

- Crew Clock integration or workflow
- Job/crew communication workflows
- Custom automation buildouts
- Advanced reporting
- Priority support

Note: Crew Clock can become the wedge offer for trades and field-service companies because it connects directly to time savings, payroll/admin pain, and crew accountability.

30-Day Client Math

To get 10 paying clients/month, assume:

- 100 leads reached

- 20 book audit/demo calls
- 12 show up
- 10 close OR 8 close + 2 from follow-up/referral

A more realistic early-stage target:

- 300–500 cold/warm prospects touched per month
- 30–50 conversations
- 15–25 booked calls
- 10–15 completed demos/audits
- 5–10 closes

Key point: 10/month is possible only if Justin and Tony treat this like daily sales activity, not “launch a website and wait.”

Acquisition Channels

1. Google Ads

Campaign Objective

Generate booked audit/demo calls from local small business owners searching for automation, CRM, booking, missed call, business app, or lead follow-up help.

Recommended First Campaigns

Campaign 1 — Missed Calls / Lead Capture

Target high-intent business owners who know they’re losing calls/leads.

Sample keywords:

- missed call text back service
- missed call automation
- small business phone automation
- automated follow up for small business
- lead follow up automation
- business texting automation

Ad angle:

Stop Losing Leads When You Miss Calls

Campaign 2 — Small Business Automation

Target broader business owners looking to save time.

Sample keywords:

- small business automation
- automate my business
- crm for small business
- business automation software
- appointment booking automation
- customer follow up automation

Ad angle:

Get Your Time Back With 1APP

Campaign 3 — Trades / Field Service

Target the strongest niche first.

Sample keywords:

- software for contractors
- contractor scheduling app
- crew time tracking app
- field service app for small business
- job scheduling software for contractors
- contractor crm

Ad angle:

One App For Leads, Jobs, Follow-Up & Crews

Starting Budget

Minimum test budget:

- \$20–\$50/day for 14 days
- Focus on one niche first, preferably trades/contractors

Better test budget:

- \$50–\$100/day for 30 days

Landing Page CTA

Do not send ads to a generic homepage first.

Create a dedicated landing page:

“Free 15-Minute Time-Saving Audit for Local Businesses”

Form fields only:

- First name
 - Business name
 - Phone
 - Email
 - What do you want to automate? dropdown
-

2. Chamber of Commerce / Local Business Lists

Important Compliance Note

Do not assume a Chamber list can be blasted by email.

Before sending campaigns, confirm:

- Did the businesses consent to receive marketing emails?
- Is the list public or member-only?
- Are there Chamber rules about solicitation?
- Does the list include role-based emails like info@, admin@, sales@?
- Are you operating under Canadian CASL requirements?

Safer Use of Chamber Lists

Use Chamber lists for:

- Prospect research
- Building a call list
- Finding business categories
- Direct mail
- Manual personalized outreach
- LinkedIn/Facebook research
- Warm introductions through Justin

Email can be used carefully when there is a legitimate business context, but every message should be personalized, relevant, include business identity, and include an unsubscribe path.

3. Cold Market Sales

Daily Sales Activity Target

Justin/Tony combined:

- 30 cold calls/day
- 20 personalized emails/day

- 10 social DMs/day
- 5 local business walk-ins/day if targeting Peterborough/Kawartha/local trades

Weekly target:

- 150 calls
- 100 emails
- 50 DMs
- 10–20 booked audits

Cold Call Opener

Hey, is this [Name]? It's Justin/Tony with 1APP. Quick one — we help small businesses stop losing leads and time from missed calls, slow follow-up, and manual admin. I'm not calling to sell you some massive software project. I just wanted to ask: when someone calls your business and you're tied up, does that lead get followed up automatically right now?

If yes:

Nice — what are you using for that?

If no:

That's exactly what we fix. We set up a simple system so missed calls get texted back, leads get booked, reminders go out, and follow-up happens without you chasing it. Would it be worth a quick 15-minute audit to see where you're leaking time or leads?

CTA:

I've got [day/time] or [day/time]. Which is better?

4. Email Campaign

Cold Email 1 — Missed Leads Angle

Subject: quick question about missed calls

Hi {{first_name}},

Quick question — when someone calls {{business_name}} and nobody can answer, does that lead get followed up automatically?

1APP helps small businesses capture missed calls, send instant text replies, book appointments, and follow up without the owner chasing everything manually.

Worth a quick 15-minute look to see where you're losing time or leads?

— Tony / Justin

1APP

Follow-Up 1 — Time Back Angle

Subject: getting time back

Hi {{first_name}},

Most owners don't need another app — they need fewer things falling through the cracks.

That's what 1APP is built for: missed call text-back, booking, reminders, follow-up, reviews, and simple business automations in one place.

If we could show you 2–3 automations that would save you time this month, would that be worth a look?

— Tony / Justin

Follow-Up 2 — Trades / Crew Clock Angle

Subject: crew/admin question

Hi {{first_name}},

For service businesses with crews, admin gets messy fast — hours, jobs, follow-up, reminders, and customer communication all end up scattered across texts and notebooks.

We're building 1APP to help businesses keep leads, jobs, and crew workflows tighter without adding more admin.

Open to a quick 15-minute audit?

— Tony / Justin

Breakup Email

Subject: should I close the loop?

Hi {{first_name}},

Should I close the loop on this?

I reached out because 1APP helps local businesses save time with missed-call follow-up, booking, reminders, and automation.

If it's not a priority, no worries. If it is, I can send over a quick example of what we'd automate first.

— Tony / Justin

5. Sales Demo / Audit Structure

15-Minute Audit Agenda

1. Current workflow

- How do leads come in?

- What happens when calls are missed?
- How are appointments booked?
- How do reminders go out?
- How are estimates/invoices followed up?
- How are crew hours tracked?

1. Find the leak

- Missed calls
- Slow follow-up
- No pipeline
- Manual reminders
- No review requests
- Crew/admin chaos

1. Show the fix

- 1APP workflow map
- What gets automated first
- What owner stops doing manually

1. Close

- “If we could set this up for you this week and start saving you time immediately, would you want us to build it?”

6. Crew Clock Product Angle

Why Crew Clock Matters

Crew Clock gives 1APP a more tangible hook than generic “AI automation.”

Business owners understand:

- employee hours
- job site accountability
- payroll admin
- crew communication
- wasted time
- messy texts

Possible Positioning

Crew Clock by 1APP helps field-service businesses track crew time and job activity while connecting everything back to the business automation system.

How It Fits the Offer

Starter/Growth clients get lead and follow-up automations.

Pro Ops clients get Crew Clock + operations workflows.

This creates a reason for contractors to choose 1APP over generic CRM/automation companies.

7. First 30-Day Execution Plan

Week 1 — Foundation

- Finalize offer and pricing
- Build dedicated audit landing page
- Build Google Ads campaign
- Build cold call script
- Build email sequence
- Build lead tracker/CRM pipeline
- Decide first niche: recommended = contractors/trades

Week 2 — Launch Outreach

- Launch Google Ads at \$20–\$50/day
- Build first list of 200 prospects
- Start cold calls and email sequence
- Book first 5–10 audits
- Track objections

Week 3 — Sell + Refine

- Run audits/demos
- Close first clients
- Improve landing page based on objections
- Tighten offer around what buyers actually care about
- Create first simple case study from any result/test/demo

Week 4 — Scale What Works

- Increase ad spend only if calls are booking
- Double down on best niche

- Build referral ask for every client/demo
 - Package Crew Clock if trades respond strongly
 - Build monthly reporting template
-

8. Key Metrics

Daily:

- Calls made
- Emails sent
- Replies
- Demos booked

Weekly:

- Cost per lead
- Cost per booked audit
- Show rate
- Close rate
- Revenue closed
- Biggest objections

Monthly:

- New paying clients
 - MRR added
 - Churn/cancellations
 - Average setup time per client
 - Best-performing niche
-

9. Biggest Risks

Risk 1 — Too broad

If 1APP targets every small business, the message gets weak.

Recommendation: Start with contractors/trades first.

Risk 2 — Selling “AI” instead of outcomes

Most business owners don't care about AI. They care about saving time, getting more jobs, and not missing leads.

Recommendation: Lead with time back, missed leads, follow-up, booking, and crew/admin pain.

Risk 3 — Email compliance/list quality

Chamber lists may not be legal or effective for bulk cold email.

Recommendation: Use them for research and personalized outreach first. Confirm CASL/compliance before bulk campaigns.

Risk 4 — Building too much before selling

Crew Clock is valuable, but only if buyers confirm they'll pay for it.

Recommendation: Sell the audit and manually validate demand before overbuilding.

10. Immediate Next Steps

1. Choose the first niche: contractors/trades recommended.
 2. Create the audit landing page.
 3. Build a 200-business prospect list.
 4. Launch one Google Ads campaign with one CTA: Free 15-Minute Time-Saving Audit.
 5. Start daily outbound immediately.
 6. Use every conversation to sharpen the Crew Clock angle.
-

One-Sentence Business Plan Summary

1APP will acquire 10 new paying clients every 30 days by targeting busy local service businesses — starting with contractors/trades — using Google Ads, personalized outbound, email campaigns, and a free Time-Saving Audit that leads into managed automation packages starting around \$199/month, with Crew Clock becoming the operational wedge for field-service businesses.
