

1APP â 60-Second Pitch

AI automation for trades and service businesses â built to stop missed calls and book more jobs.

Quick question: if someone calls your business and you miss it, does anything automatically follow up â or does it depend on someone calling back later?

At 1APP we stop missed calls from becoming lost jobs. We install and manage one simple business app that does missed-call text-backs, a 24/7 AI voice receptionist that qualifies and books, online booking and confirmations, multi-step SMS/email follow-up, appointment reminders, review requests, two-way messaging, CRM & pipeline tracking, and easy invoicing/payments â so your crew shows up to booked work instead of chasing leads.

We work with trades and local service businesses and offer Starter, Growth, and Revenue Engine plans plus add-ons like website builds, social management, ads, and custom automations. Book a free 15-minute audit â we'll show three places you're leaking leads and the first fix to get more booked jobs.
