

Red-E-Bins Peterborough Lead Capture & Follow-Up Plan

A simple automation plan to help Red-E-Bins capture more bin rental inquiries, respond faster, reduce missed-call leakage, and turn completed rentals into more Google reviews.

\$335–\$435

Typical visible rental value

2 jobs

Recovered rentals can cover the system

24/7

Follow-up even when the team is busy

The Simple Version

Red-E-Bins already has the core foundation: a clear local service, simple bin sizes, online ordering, and a strong Peterborough/Kawartha service area.

The main opportunity is not “more software.” It is making sure every call, website visitor, inquiry, order, delivery, pickup, and review request is followed up automatically.

What 1APP Would Fix First

Missed calls

If someone calls while Matt is busy and no one answers, they may call the next bin rental company. 1APP sends an instant text back so the lead is not lost.

Website questions

Visitors often need simple answers before booking: bin size, delivery area, rental length, weight, or prohibited items. A website chat/intake form captures them.

Booking/order follow-up

Customers get confirmation, delivery reminders, pickup reminders, and clear instructions without Matt manually chasing every detail.

Google reviews

After pickup, happy customers are automatically asked for a Google review. This builds trust and helps future customers choose Red-E-Bins.

Recommended Service

RECOMMENDED STARTING POINT

Growth Package — Lead Capture, Follow-Up & Review Engine

Recommended Setup

\$1,000 one-time

Complete buildout of the highlighted Growth plan services, workflow setup, pipeline, message templates, website widget, testing, and launch support.

Monthly Management

\$499 / month

Ongoing automation support, review system management, adjustments, and monthly optimization.

Why this fits Red-E-Bins:

bin rentals are time-sensitive. If the system recovers even a couple of extra rentals each month, it can pay for itself while also reducing admin work.

Everything from Standard

2-Way Text & Email

GMB Messaging

Web Chat

Reputation Management

Facebook Messenger

GMB Call Tracking

Missed Call Text Back

Text To Pay

Launchpad

Calendar

CRM

Email Marketing

What The Growth Package Includes

This is the recommended plan for Red-E-Bins. The highlighted services are included and set up around bin rental leads, booking/order follow-up, payments, reviews, and customer communication.

Everything from Standard	The basic foundation is included first: contact management, basic communication tools, simple automation, and the core app setup.
2-Way Text & Email Conversation	All customer texts and emails can be handled in one place, so bin rental questions, follow-ups, and booking details do not get scattered across phones and inboxes.
GMB Messaging	Messages from Google Business Profile can be captured and managed, so people who find Red-E-Bins on Google can ask questions and get routed into the same follow-up system.

Web Chat

A chat widget on the website can answer common questions and capture name, phone, email, location, and bin needs from visitors who are not ready to order yet.

Reputation Management

After completed rentals, customers can automatically receive a Google review request. This helps build trust and makes Red-E-Bins look stronger when new customers compare options.

Facebook Messenger

Facebook messages can be connected into the system, so inquiries from social media are easier to respond to and follow up with.

GMB Call Tracking

Calls from Google can be tracked so Red-E-Bins can see where calls are coming from and better understand how many leads Google is producing.

Missed Call Text Back

If a customer calls and the call is missed, they get an instant text asking what bin they need and where they need it delivered. This is one of the biggest lead-saving features.

Text To Pay

Customers can receive a simple payment link by text, making it easier to collect payment or deposits without extra back-and-forth.

Launchpad

Launchpad gives the business owner a simple place to access key tools, conversations, tasks, contacts, and business activity.

Calendar

Delivery, pickup, callbacks, and job-related appointments can be organized so fewer details live only in someone's head or text thread.

CRM

Every customer and lead is stored in one system with notes, contact details, history, tags, and follow-up status.

Opportunities

Each bin rental inquiry can be tracked through stages like new inquiry, quote needed, bin requested, delivery scheduled, pickup scheduled, completed, and review requested.

Email Marketing

Red-E-Bins can send simple seasonal campaigns, customer updates, follow-ups, and reactivation emails to past customers or old leads.

Plan Recommendation & Other Services

Standard

\$299 /mo

Basic communication and lead capture tools for businesses that only need a simple starting point.

Best for: a business that only wants the basics and does not need the full Red-E-Bins workflow yet.

RECOMMENDED

Growth Plan

\$499 /mo

Recommended setup: \$1,000 one-time.

Includes the highlighted services: 2-way text/email, Google messaging, web chat, reputation management, Facebook Messenger, call tracking, missed-call text back, text-to-pay, Launchpad, Calendar, CRM, Opportunities, and Email Marketing.

Best for: Red-E-Bins right now.

Revenue Engine

\$799+ /mo

Setup: usually \$1,500+ one-time.

Deeper automation, ads support, reporting, content support, website conversion improvements, campaigns, and more hands-on optimization.

Best for: scaling once the Growth foundation is working.

Add-On Services

The highlighted Growth plan is the recommendation. These extra services can be added later if Red-E-Bins wants to expand beyond the initial setup.

AI Voice Assistant

Answers overflow or after-hours calls, collects details, answers basic questions, and routes hot leads to the right next step.

Website / Landing Page Improvements

Cleaner calls-to-action, better trust sections, stronger service-area pages, and easier quote/order paths.

Local SEO & Google Profile Support

Improve the Google Business Profile, service descriptions, photos, posts, review strategy, and local search foundation.

Ad Campaign Support

Google or social ads can be added after tracking and follow-up are in place, so paid traffic does not go into a leaky system.

Social Planner

Optional social posting and scheduling for Facebook/Instagram. Useful later, but not required for the first Red-E-Bins setup unless Matt wants content support.

Invoice Automation

Optional invoice workflows can be added if Red-E-Bins wants invoice creation, payment reminders, or admin follow-up tied into the system.

Custom Operations Automation

Extra workflows for delivery/pickup coordination, internal notifications, customer instructions, and team task reminders.

Example Customer Journey

1. Customer calls

They need a bin for a cleanup, renovation, move, or jobsite.

2. If missed, text goes out

“Sorry we missed you — are you looking for a 5-yard or 10-yard bin rental?”

3. Lead is captured

The inquiry is saved in the pipeline with name, phone, location, and bin need.

4. Customer gets the next step

They receive a booking/order link or a callback confirmation.

5. Reminders go out

Delivery, pickup, prohibited items, and optional extra-day reminders are handled automatically.

6. Review request is sent

After pickup, the customer is asked to leave a Google review while the experience is fresh.

Why This Pays For Itself

Red-E-Bins has visible rental values around **\$335–\$435**. If the Growth system helps recover just two missed 10-yard rentals in a month, that is about **\$870 in gross booking value**. That means the recommended **\$1,000 one-time setup** can be covered quickly if the system saves even a few jobs.

The goal is not to make the business feel complicated. The goal is to recover jobs, follow up faster, reduce manual admin, and build more trust through reviews.

Recommended Next Step

Start with the **Growth Plan: \$1,000 one-time setup + \$499/month** for the highlighted services, built specifically around Red-E-Bins lead capture, customer messaging, booking/order follow-up, payments, pipeline tracking, and review growth.

Plain-English close: “Let’s install the system that captures the customer, follows up fast, tracks the rental, collects payment easier, and asks for the review after the job is done.”
