

You have the reputation. Now capture every serious lead.

KCIP's work already looks strong. The leak is speed-to-lead, booking, follow-up, and keeping every quote organized while the crew is busy doing the work.

24/7

LEAD RESPONSE

AI Voice/SMS answers when the team is on site, driving, or off the clock.

1

SHARED INBOX

Calls, texts, forms, and replies land in one KCIP conversation hub.

5–10h

ADMIN SAVED

Less phone tag, manual reminders, quote chasing, and message digging.

Competitors are selling trust. KCIP can win with trust plus speed.

KCIP already has credibility: established since 2017, community recognition, high-ticket visual work, and a broad service menu. 1APP adds the always-on front office that makes the business feel instantly responsive.

Strong

MARKET POSITION

Custom pools, revamps, liners, concrete, turf, stone, cabanas, lighting, sport courts, and seasonal pool service create multiple revenue paths.

Leaky

LEAD CAPTURE

Shopify-style site, generic quote path, no obvious estimate booking, and likely manual follow-up create avoidable lost opportunities.

What KCIP has going for it

- Community proof
- High-ticket projects
- Visual work
- Repeat seasonal services

The hard part — skill, trust, and visible work — already exists. That is why the system should focus on conversion, not just awareness.

What is costing money

- Missed calls
- Manual quotes
- No obvious booking
- Scattered messages

If a homeowner is ready to talk and KCIP is busy, the lead should still be answered, qualified, booked, and tracked.

Competitive snapshot

Peterborough Pool & Patio

✓ Strong proof: 388 reviews / 4.9 stars shown publicly.

KCIP opening: faster response + booking.

Hubble Landscaping

✓ Premium complete backyard positioning.

KCIP opening: clearer guided sales journey.

One Landscape

✓ 25+ years, 25+ team, BBB trust.

KCIP opening: automated reviews/referrals.

A front office that works while the crew works.

This is not “just a website.” It is a lead response, booking, CRM, follow-up, review, and seasonal reactivation system.

Every inquiry becomes a tracked KCIP opportunity.

1

Lead arrives

Website, phone, missed call, Facebook, Google, web chat, or referral.

2

Instant reply

AI/SMS captures service type, town, urgency, timeline, and photos.

3

Estimate booked

Qualified prospects book into controlled estimate windows.

4

Pipeline tracked

New lead → contacted → booked → quoted → won/lost.

5

Follow-up runs

Reminders, quote follow-up, reviews, referrals, seasonal campaigns.

Recommended workflows

01

Missed-call text back

When a call is missed, KCIP instantly texts back and asks what service the customer needs.

02

AI Voice receptionist

Answers overflow/after-hours calls, qualifies jobs, captures details, and routes urgent issues.

03

Estimate booking calendar

Replace vague “Free Quote” with controlled “Book Your Backyard Estimate” appointment blocks.

04

Quote follow-up

Unclosed quotes get follow-up at 1, 3, 7, and 14 days with proof, photos, and easy reply options.

05

Seasonal reminders

Spring openings, inspections, leak checks, fall closings, liner replacement, and early booking campaigns.

06

Review + referral engine

Completed jobs trigger review requests, referral prompts, and private save paths for unhappy customers.

Try the front office without porting your business number.

KCIP can test 1APP with a dedicated local trial number and booking system first. No risky phone-number move. No full website rebuild required. Just a clean way to prove whether instant response, AI/SMS, booking, and follow-up save time and capture more opportunities.

What KCIP gets for 30 days

- A dedicated local KCIP quote/estimate number
- Calls forwarded to the existing business phone
- AI Voice for overflow or after-hours calls
- Missed-call text back on the trial number
- 2-way text/email inbox for customer replies
- Estimate booking calendar
- Quote request form or temporary landing page
- CRM pipeline to track every lead and quote
- Basic quote follow-up sequence
- Weekly trial snapshot: calls, messages, bookings, and opportunities

What does not need to happen yet

- No porting KCIP's existing business number
- No full website rebuild to start
- No QuickBooks automation during the basic trial
- No large customer database migration
- No long-term commitment until the system proves itself

Simple trial goal: prove that faster response + easier booking creates more conversations and saves admin time.

How the trial works

1

Set up

Create KCIP trial number, inbox, calendar, pipeline, and quote form.

2

Connect

Add the trial quote link/number to website, Facebook, or quote CTA.

3

Respond

AI/SMS answers, qualifies, and captures details when KCIP is busy.

4

Book

Qualified leads book estimates or get routed for a callback.

5

Review

After 30 days, check captured leads, bookings, time saved, and next steps.

Best way to position it

“Instead of changing your main number right away, we’ll give KCIP a dedicated trial quote line and front-office system for 30 days. If it captures leads, saves time, and makes follow-up easier, then we can decide whether to connect more of the business permanently.”

Start with Growth. Scope the extras separately.

Website rebuilds, QuickBooks automation, and Revenue Engine features are custom infrastructure. They should increase setup fees instead of being buried inside the base package.

Base recommendation: 1APP Growth

\$499/mo

Setup starts at \$999

- AI Voice/SMS messaging
- Missed-call text back
- 2-way text and email inbox
- CRM + opportunity pipeline
- Estimate booking calendar
- Web chat / form capture connection
- Appointment reminders + quote follow-up

What 2-way text/email means

KCIP can send and receive customer texts/emails from one shared business inbox instead of everything living on Scott's personal phone, random email threads, Facebook DMs, and voicemail.

- Customer texts "Can you come Tuesday?" and it lands in **KCIP's inbox**.
- The full conversation stays attached to the customer record.
- Automations can pause when a real person replies.
- Anyone with access can see history and follow up properly.

Optional add-ons

Website

Website revamp / rebuild

Turn the Shopify brochure into a trades lead machine: homepage, service pages, gallery, reviews, booking CTAs, quote intake, and local SEO.

Suggested setup add: +\$1,500–\$3,500+

Accounting

QuickBooks automation

Connect won jobs, customers, estimates, invoices, and payment reminders where possible.

Suggested setup add: +\$750–\$2,000+

Upgrade

Revenue Engine

Social Planner, invoices, form builder, survey builder, trigger links, templates, advanced workflows, funnels/websites/blogs, campaigns, reporting.

Suggested plan: \$799/mo + higher setup

Growth

Seasonal campaigns

Spring openings, fall closings, inspections, leak checks, liner replacement, and early-booking campaigns.

Suggested setup add: +\$500–\$1,250

"Let's start with Growth so your lead response, estimate booking, and follow-up are handled. If you want the website rebuilt or accounting connected, we scope that separately because that's custom infrastructure — not a basic setup."
