

Peterborough Waterproofing — GHL Full Autopilot Onboarding Questions

Client: Peterborough Waterproofing

Contact: Justin Roffey

Package: Full Autopilot — \$597/mo + \$750 setup

Goal: Collect everything needed to build the GoHighLevel system cleanly: phone, calendar, missed-call text-back, AI voice/call handling, lead pipeline, follow-up, reviews, reporting, and staff routing.

1. Business Basics

1. What is the exact business name you want shown in messages/emails?

2. What is the main business address?

3. What is the website URL?

4. What is the Google Business Profile link?

5. What are the main business phone number and email?

6. Who is the main decision-maker for approvals?

7. Who should Tony contact for setup questions day-to-day?

8. Do you have a logo, brand colours, or any images you want used in emails/forms?

2. Services and Service Area

9. What services do you want listed in the system? Examples: basement waterproofing, foundation repair, sump pumps, drainage, crack repair, mold/moisture issues.

10. What services do you NOT want the system to offer or mention?

11. What towns/cities do you serve?

12. Are there areas you will not travel to?

13. Do you charge for estimates, or are estimates free?

14. Are there situations where a customer should be told to call someone else instead?

15. Are any jobs urgent/emergency priority? If yes, what counts as urgent?

3. Current Phone and Lead Flow

16. Who answers the phone right now?

17. What happens when the phone is missed during business hours?

18. What happens after hours?

19. Roughly how many calls are missed per week?

20. Where do leads come from right now? Google, referrals, Facebook, website, ads, repeat customers, yard signs, etc.

21. Are calls currently forwarded to anyone?

22. Do you use voicemail? If yes, what does the voicemail currently say?

23. What are the most common reasons people call?

24. What customer details do you normally collect before booking or quoting?

4. Phone Number Decision

25. Do you want to automate the existing public business number, or use a new dedicated automation number?

26. If using the existing number, who owns the number and which carrier/account is it under?

27. If using a new number, should it be shown on the website, Google Business Profile, ads, voicemail, or only used for follow-up?

28. Should missed calls trigger an automatic text immediately?

29. Should calls route to Justin first, Belinda/admin second, then another staff member if no answer?

30. Who should calls/texts go to when Justin or Belinda are away, on vacation, or busy?

31. Do any staff members need their personal numbers hidden from customers?

5. Business Hours and After-Hours Rules

32. What are your regular business hours?

33. Do you answer calls on evenings or weekends?

34. What should happen after hours: auto-reply only, AI voice answer, book estimate, collect info, or notify staff?

35. Are there holidays or seasonal hours to account for?

36. How fast do you want customers contacted after a missed call?

37. What response time should the system promise customers, if any?

6. Estimate Booking Rules

38. Do you want customers to book directly into a calendar, or should the system collect info and have staff confirm manually?

39. Who performs estimates?

40. What days/times are available for estimates?

41. How long should an estimate appointment be?

42. How much travel/buffer time is needed between appointments?

43. Do you need different calendars for different people/crews?

44. What information is required before an estimate is booked?

45. Should customers receive confirmation texts/emails?

46. Should customers receive 24-hour and 1-hour reminders?

47. What should happen if a customer cancels or reschedules?

7. AI Voice / Call Answering

48. Do you want the AI voice agent to answer all calls, only missed calls, or only after-hours calls?

49. What name should the AI assistant use?

50. What should the opening greeting say?

51. What questions should the AI ask every caller?

52. What questions should the AI never ask?

53. What services/prices should the AI be allowed to mention, if any?

54. When should the AI transfer/escalate to a human immediately?

55. What should the AI say if it does not know the answer?

56. Should the AI book estimates directly or only collect information for callback?

57. Are there emergency situations where the AI should tell the customer to call immediately?

8. Lead Pipeline Stages

58. What stages do you want in the pipeline? Recommended: New Lead, Contacted, Estimate Booked, Estimate Completed, Quote Sent, Follow-Up Needed, Job Won, Job Lost.

59. Who is responsible for moving leads through the pipeline?

60. What counts as a qualified lead?

61. What makes a lead not a fit?

62. What loss reasons should be tracked? Price, outside service area, no response, went with competitor, not urgent, other.

63. Do you want tasks created automatically when a lead needs follow-up?

9. Follow-Up Messages

64. If someone calls but does not book, how many follow-ups should they get?

65. Preferred follow-up schedule? Recommended: immediate, 1 day, 3 days, 7 days.

66. Should follow-up be SMS only, email only, or both?

67. What tone should the messages use: friendly, professional, urgent, casual?

68. Are there phrases you want included or avoided?

69. Should follow-up stop automatically once an estimate is booked?

70. Should old/dormant leads be reactivated later?

10. Reviews and Reputation

71. Do you currently ask for Google reviews?

72. Who should receive review requests?

73. When should review requests be sent: after estimate, after job completion, after payment, or manually triggered?

74. What Google review link should be used?

75. Who should be notified when a new review comes in?

76. Do you want help responding to reviews?

11. Staff Access and Mobile App

77. Who needs HighLevel/mobile app access?

78. For each person: name, email, role, phone number.

79. What should each person be allowed to do? View only, reply to messages, make calls, manage calendar, move pipeline stages, send invoices, admin access.

80. Who should receive push notifications for new leads?

81. Who should receive appointment notifications?

82. Who should receive missed-call alerts?

83. Who covers the business when Justin or Belinda are away?

12. Website, Forms, and Integrations

84. Do you have a website contact form now?

85. Where do form submissions currently go?

86. Do you want a new estimate request form built?

87. Should the form be embedded on the website?

88. Do you use Facebook/Instagram messages for leads?

89. Do you use Google Ads, Facebook Ads, or other lead sources?

90. Do you need invoices/payments connected now, or later?

91. If payments are needed: do you use Stripe, Square, QuickBooks, Wave, or something else?

13. Reporting and Success Metrics

92. What do you want to see in the monthly report?

93. Recommended metrics: missed calls captured, new leads, booked estimates, follow-ups sent, response rate, reviews requested, reviews received, won/lost leads.

94. What would make this feel like a win after 30 days?

95. What would make it worth keeping after 90 days?

96. What is the biggest bottleneck Tony should solve first?

14. Approval Items Before Launch

97. Who approves final customer-facing messages?

98. Who approves the phone number path?

99. Who approves the AI voice script?

100. Who approves the calendar/booking rules?

101. Who should be on the final walkthrough before launch?

102. Preferred go-live date?

Minimum Must-Haves Before Tony Can Build

- Business name, address, website, main phone, main email
- Services offered and service area
- Business hours and after-hours rules
- Phone path decision: existing number or new dedicated number
- Estimate booking rules and calendar availability
- Staff users and notification preferences
- Customer questions to collect before estimate
- Pipeline stages
- Follow-up schedule
- Review link
- Approval contact for messages and launch
