

# What Is Agentic AI?

And how it can save you hours every week — even from your phone

## Regular AI vs. Agentic AI

**Regular AI** (like using ChatGPT as Google) — you ask a question, it answers. You still do all the work.

**Agentic AI** — you give it a task, it thinks through the steps, uses tools, makes decisions, and gets it done. You step away.

*"Regular AI is a smart employee who only works when you're talking to them. Agentic AI is a manager — you say 'handle this,' and they figure it out and report back."*

## What It Can Automate For Your Business

| Your Problem                             | What Automation Does                     |
|------------------------------------------|------------------------------------------|
| Missed calls from customers              | Auto-texts them back in 30 seconds       |
| Writing the same quotes over and over    | AI drafts it from a template in seconds  |
| Forgetting to follow up                  | Automated reminder sequence sent for you |
| Customers no-showing appointments        | Auto-reminder texts 24 hrs + 1 hr before |
| Answering the same 10 customer questions | AI chatbot handles it instantly, 24/7    |

## Start Today — From Your Phone (Free)

Download **ChatGPT** or **Claude** — both free on iOS and Android. Then shift how you use them:

### ✗ DON'T DO THIS (USING IT LIKE GOOGLE)

*"What's a good price for painting a room?"*

### ✓ DO THIS INSTEAD (GIVING IT A JOB)

*"I'm a painter. A customer wants their 12x14 living room painted, two coats. Write me a professional quote email with my pricing at \$X."*

The difference: you go from getting *information* to getting *work done*.

## The Three Levels of Automation

1

### AI Assistant

Free — Start here

ChatGPT or Claude on your phone. Draft messages, quotes, replies, ideas. You still send — but in 10% of the time.

2

### Auto-Response

~\$100–200/mo

Missed call text back, booking calendar, appointment reminders. Runs 24/7 without you touching it.

3

### Full Autopilot

~\$300–600/mo

AI answers your calls, books jobs, sends follow-ups, requests reviews. You focus on the work only you can do.

## Ready to Save Time?

The best place to start: **one thing you do every week that eats your time.**

Tell me what it is — and I'll show you exactly how to automate it.
